Evolutionary Persistence of DNA Methylation for Millions of Years after Ancient Loss of a De Novo Methyltransferase

It has come to our attention that in preparing the final version of this article, the authors inadvertently misspelled the last names of authors Elizabeth Gienger as “Elizabeth Geinger” and Sophie Cooke as “Sophie Cook.” In addition, an affiliation of Jonathan Pritchard and Harold Pimentel with the Department of Genetics, Stanford University School of Medicine was inadvertently omitted. These errors have been corrected in the article online.
